

# MOBILITY CITY

WE PROFESSIONALLY SANITIZE AND FIX WHEELCHAIRS

Wheelchair sanitizing is essential to reduce pathogen development in your facility. Our premier same-day service uses steam to sanitize, killing 99.9% of bacteria and viruses. Mobility City's "workshop on wheels" repairs, cleans and sanitizes your (and your residents') mobility equipment without stepping foot in your facility!

## ***Do wheelchairs really spread bacteria and viruses within a facility?***

**YES!** "Transmission of pathogens (Staphylococcus aureus, Pseudomonas aeruginosa, and E. coli) has been linked to medical devices and wheelchairs...and **wheelchairs constitute a reservoir of these bacteria and a means of spreading them.**"  
(Peretz, A et al. World Journal of Microbiology and Biotechnology 2014)

## ***Are organisms destroyed by steam exposure?***

**YES!** "Steam vapor machines are effective against a wide range of pathogens, notably VRE, MRSA and Gram-negative bacilli, including P. aeruginosa. Selected organisms are **reduced to undetectable levels in less than 5 seconds following exposure to steam.**"  
(Dancer, S. Clin Microbiol Rev. 10/27/2014)

Flat rate of **only \$150/hr** to inspect and sanitize each piece of equipment.

**Call now** to schedule.

We can do most jobs within 24 hours!
