Hoarding disorder was added to the Diagnostic and Statistical Manual of Mental Disorders (DSM) in 2013, but because the clinical recognition of hoarding disorder is relatively new, few healthcare professionals have extensive training in the diagnosis and treatment of hoarding disorder. Additionally, hoarding disorder is a challenging mental health issue, particularly in older adults who hoard.

SPEAKER

Catherine Ayers, PhD, ABPP, is a Section Chief at the VA San Diego Healthcare System (VASDHS) La Jolla Mental Health Outpatient Clinics, Professor in the University of California San Diego Department of Psychiatry, Director of the CREST Community Program for older adults with hoarding, and faculty member in the San Diego State University Joint Doctoral Program in Clinical Psychology. Her research is focused on treatment outcomes for the obsessive compulsive spectrum and related disorders.

OBJECTIVES

- Demonstrate knowledge of the features and treatment of hoarding disorder.
- Utilize and implement five techniques when interacting with an older adult presenting with hoarding disorder.
- Apply the DSM criteria for hoarding disorder and demonstrate knowledge of the characteristics uniquely associated with hoarding disorder.

*ASWB CE Credit Changes 2018: Beginning September 25, 2018, ASA will no longer be able to issue ASWB CE credits for recorded web seminar attendance. You can only claim ASWB CE credit if you watch the webinar live. We apologize for any inconvenience. This change is due to ASWB ACE Provider distance learning requirements. The webinar is designed for professional referral sources and family caregivers. Eligible healthcare professionals can claim ONE FREE CEU credit within one month of completion of the webinar. This web seminar is approved for AOTA contact hours in addition to CE Credits approved for all ASA web seminars.
