

MENTAL HEALTH MEDICATION OVERVIEW

Thursday, July 15, 2021 2:00 PM

Medications play an important part in treating several mental health disorders. Whether you yourself take one or more of these, or the person you are working with or taking care of does, it is important to understand them. This free webinar will include a brief overview of several classes of medications used in the treatment of different mental illnesses, with particular attention paid to use in older adults.

Types of medications covered will include:

- Antipsychotics
- Antidepressants
- Antianxiety Medications
- Mood Stabilizing Medications
- Alzheimer's Medications

Presented by:

NC Geriatric Adult Mental Health Specialty Team (GAST)

For more information on GAST, contact Dawn.Lillard@mytahome.com or 704-953-1553.
