Veterans and Dementia: What You Need to Know

Veterans and Dementia: What you need to know

Saturday June 17, 2023

9 a.m. - 12:25 p.m.

Interactive Virtual Symposium (Zoom)

Not only are Veterans at increased risk of developing dementia, they frequently have mental health challenges that complicate their care. In this program, we will bring together members of our knowledgeable dementia care team including specialists in memory disorders, geriatric psychiatry, geriatric medicine, social work, dementia research, and more.

We will learn how to access these supports and resources through the VA that can address the full range of dementia systems in order to optimize your dementia care and quality of life.

Expert Speakers:

Ralph H Johnson VA Health Care System:

- Cheryl Lynch, MD, MPH
- Nicholas Milano, MD
