With your documentation completed in advance of any medical appointment, therapy, and/or hospital stay, you are guaranteed to improve your outcomes by giving your medical professionals the most up-to-date information related to your health. Once completed, your HealthCare Notebook will improve your communication and care across all medical services. In addition, your spouse, children, caregiver, power of attorney, or whomever you appoint will thank you for providing this information so that they understand your goals and wishes.
